SVENSKEFFIXITY

WELCOME TO RAPID

We are much more than suppliers of products for your home or professional life. We are advisors and providers of proven concepts that help you with a wide range of tasks. From larger construction projects to quick problem solving, whatever you're looking for, Rapid has it.

Choosing Rapid means choosing a reliable specialist with proven solutions specially adapted for the user. In order to keep our promises and to ensure quality day after day, we monitor and control the entire value chain, from idea to finished product. The design and development part of this process is built on the solid foundation of our Swedish heritage, with effective and easy solutions as well as a product range filled with a wide variety of products for effective fastening.

Rapid are always close at hand. Our distribution network covers the entire world and in Europe and Asia we have fully-owned production facilities. This gives us global strength with a local presence, making national and regional adaptations of our product range possible. It also makes it possible for us to provide our users with an unsurpassed offer, no matter the market.

Our approach to developing, manufacturing and marketing products is all about efficiency, innovation, quality and simplicity. That's why we've chosen to call our way of doing things 'Svensk Effixity'.

DRIVEN BY TRADITION

Rapid has a long and proud history. This is best explained by the constant care we show for our traditions and our way of doing things - making it easy for our users by offering products that fulfil their ever-changing needs and requirements.

Ever since we were established in 1936, we've based our company concept on Swedish engineering. Something that translates into – among many other things – reliable quality that simplifies the lives of our users. Our entrepreneurial inheritance is also characterised by being quick to respond and ready to embrace and adapt to the latest needs and demands of the market. We continuously develop and produce new solutions, keeping up with the shifting demands and requirements of our users. We often find ourselves dealing with, and finding, completely new solutions and functions, in addition to adapting existing products to fit current conditions.

Today, Rapid is one of the world's leading fastening specialists and we offer products within three business areas – Office, Tools and Inside Solutions. Our way of thinking, with easy-to-use, effective stapling products, has had a major impact in over 120 countries worldwide, where Rapid has been a part of Acco Brands since 2017.

FOR EVERY TODAY, THERE'S A TOMORROW

Rapid's sustainable development strategy is present in everything we do in our daily work. We call it "Taking Care of Tomorrow".

The strategy has been designed to enrich our future environment and to ensure Rapid remains a prosperous company. One of the strategy's objectives is making sure our raw material waste never exceeds 1%. We continuously work to reduce carbon dioxide emissions and we carefully monitor the recycling of plastics as well as metal and paper waste in our production facilities. In order to reduce our environmental impact even further, we always measure our water consumption. All said, this is daily work with long-term objectives.

DISPLAY, GUIDE AND INCREASE SALES

Rapid's goal is to facilitate for both the user and the reseller in every part of the process. This is clearly visible in how we display our products in stores. Products, packaging and displays are designed to attract interest, inform and guide, because when the store visitor is given relevant information, the chances for a sale increases.

Broadening scope and seeing the full picture is a Rapid trademark. In the store environment, it should always be clear that we offer customers not only individual products, but also entire fastening systems. Packaging comes with clear and self-explanatory symbols, images and texts that place the products in their correct context and helps them as good as sell themselves. What you see is what you get, in a manner of speaking. This is also why we've chosen to use the semi-open packaging design where we leave a handle or a trigger exposed. A potential user who is guided and informed and who gets to experience the high level of quality and innovative characteristics of the product will become more certain that they're making the right choice. Of course, you already understand that store design and product placement has an impact on sales. Together with Rapid, the conditions can be improved even further. We're not only specialists when it comes to our products, we're also skilled in the art of tailoring solutions that guarantee additional sales. As a part of this, we can offer a thought-through adaptation of the product range – good, better and best – and shelf layout using Space Management.

We can also offer a number of different activities, campaigns and Point of Sales material in order to inspire and guide the user in making the right choice. And of course everything is adaptable to your particular store and other conditions. This truly makes for good business, every day.

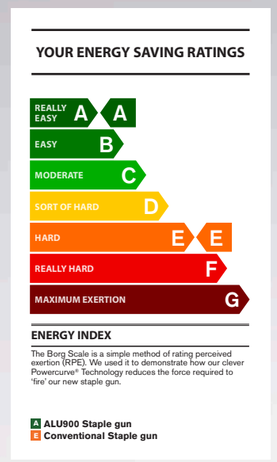
A POWERFUL PUSH TO SAVE ENERGY



Is it possible to develop staple guns that are easy to fire and simultaneously allow the user to decide how much power should be used? The answer is yes. With Rapid's unique Powercurve® Technology the need for power when firing the gun is lowered by an impressive 65 % and with the three-step power adjustment function, usage is fully optimised. When working with softer materials or shorter staples the gun can be adjusted to deliver less power, whereas when working with harder materials or longer staples power output can be increased. This means that at any given moment you'll never have to press harder than necessary.

Powercurve® Technology has been specially developed in cooperation with leading physiotherapists who have taken into account how the arm's muscles are activated when using a staple gun. This has resulted in a mechanism that is perfectly matched to the hand's power curve. This, together with the 65 % power reduction, lowers the strain on the user from an E (heavy) to an A (very easy) on the official Borg scale. The Borg scale is used to measure how a person experiences work strain and the findings are based on the results of numerous tests where consumers compared new staple guns with other existing, traditional guns on the market.

MAKE THE RIGHT CHOICE WITH RAPID

With the market's strongest fastening product range, Rapid can offer solutions for any material or any task. Here, you'll find the information that will help you find the right product for your task.

Stapling
Begin by choosing the right type of staple for the job in hand. Measurements and more details can be found in the staple guide on page 34. After doing so, choose your desired leg length and pick a suitable tool for these particular needs.

Gluing
Choose the right type of glue for the task. More information on different glue types and their usage can be found on page 60 and forward. After identifying the right glue, choose the tool best suited for your application.

Riveting
Choose the rivet best suited for the task at hand. Read more in the riveting section of our catalogue on page 72 and forward. After doing so, choose the appropriate dimension and the tool that suits your needs.

STAPLING AND NAILING

When a customer picks up any Rapid stapling product in any store across the world, they are picking up the best. This is no empty boast. As market leader Rapid consistently outsells and outperforms all competitors. There are a number of reasons why this is the case. Driven by care for our users and a thirst for innovation, our products are fitted with smart functions based on our unique insights into the demands of both professional and DIY usage. Furthermore, the majority of Rapid products are designed and manufactured in Sweden to the highest quality standards – a fact that gives extra peace of mind.

MANUAL STAPLE GUNS

Our comprehensive, market-leading product range caters for demanding professionals and DIY enthusiasts alike and has been developed to cover all situations and requirements. Our staple guns may be used once a month or eight hours a day. They may be used for tough, outdoor construction tasks or the most delicate of interior or hobby work. whatever your requirements are, our market-leading expertise and experience means we can offer a solution that gets the job done. In addition, we bring you unique innovations such as our Powercurve® Technology. Of course, the majority of Rapid staple guns are Swedish made and deliver quality and unequalled durability – everything that makes life easier and more effective for the user, whatever the task they face.

Suitable for: textiles, building materials, low-voltage cables, moisture barriers and thinner wood.

R34

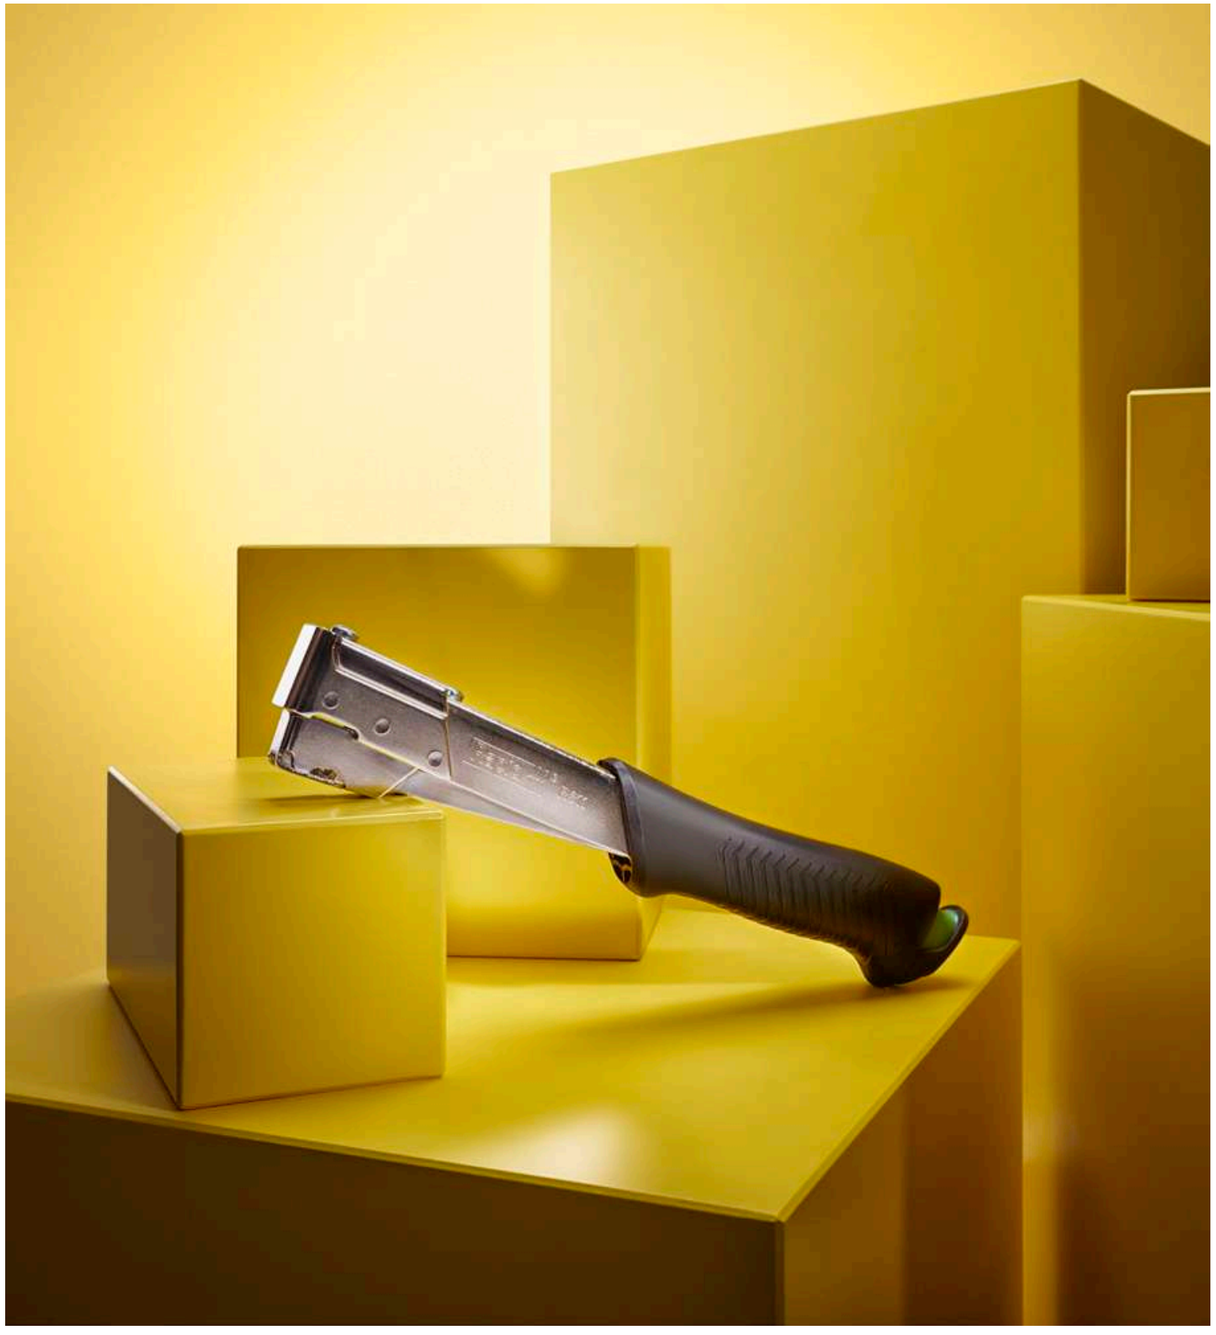
HAMMER TACKERS

Sometimes the task at hand involves quick fastening of materials with a large number of staples. This is where our hammer tackers represent the best choice. At Rapid we've amassed a wealth of experience producing some of the market's best, high quality hammer tackers. From our Swedish production facility, our range brings every user a wealth of smart, helpful features, such as bounce-back technology that makes the hammer bounce back thanks to the recoil. This significantly reduces strain on the user since it means less physical exertion. Additionally, an ergonomic handle contributes to smoother operation making any task easier and increasing working efficiency.

Suitable for: building materials such as roofing felt, moisture barriers, insulation plastic and wind protection.



R311

Staple
6–12 mm

PRO

Hammer tacker with superior precision and working life. Ideal for fastening of roofing and insulation material and damp proof coursing.

- Bottom loaded quick-load mechanism with no loose parts
- Reversible staple driver for long working life
- Large buffer plate protects the material in work
- Well balanced with patented 4-way grip handle
- All steel, heavy-duty construction
- Made in Sweden
- 2 year guarantee

ELECTRIC STAPLE AND NAIL GUNS

No matter the job in hand, Rapid's electric staple and nail guns deliver quality performance and precision fastening. Designed to cater for a broad spectrum of users and applications, we offer a highly comprehensive selection to the market. Like every Rapid product, the range has its starting point in outstanding ergonomics, performance and user-focused features. Furthermore, they are maintenance-free, and able to fasten materials quickly and with high accuracy. We even supply cordless models that offer outstanding user mobility. As well as including electric and battery powered models for more everyday tasks, our professional range also offers solutions specifically created for finishing work.

Suitable for: upholstery, panelling, skirting board, mouldings and other finishing applications.

BN64

Brad 16A 32–64 mm

PRO

Powerful cordless performance for professional users. Optimal freedom of movement and increased access into corners thanks to a 20° angled magazine. Battery operated brad nailers let the user avoid complicated gas-driven solutions. Ideal for skirting board, architrave and window trim, tongue and groove panelling, flooring, wall or indoor roofing panels.

- 20° angled magazine for easy access into corners
- 18 V Li-Ion battery (2 pcs x 2 Ah included)
- Instant trigger response for reduction of work time
- Dry-fire control
- Two-step sequential firing for safety
- Adjustable depth penetration
- More than 500 nails capacity per battery charge (2 Ah)
- Batteries are re-charged to at least 80 % in 45 mins with supplied quick charger
- Fly-wheel drive for high power and reliability
- Non-marking rubber pad to protect from scratching
- Quick-release hinge for tool free removal of jams
- 2 year guarantee

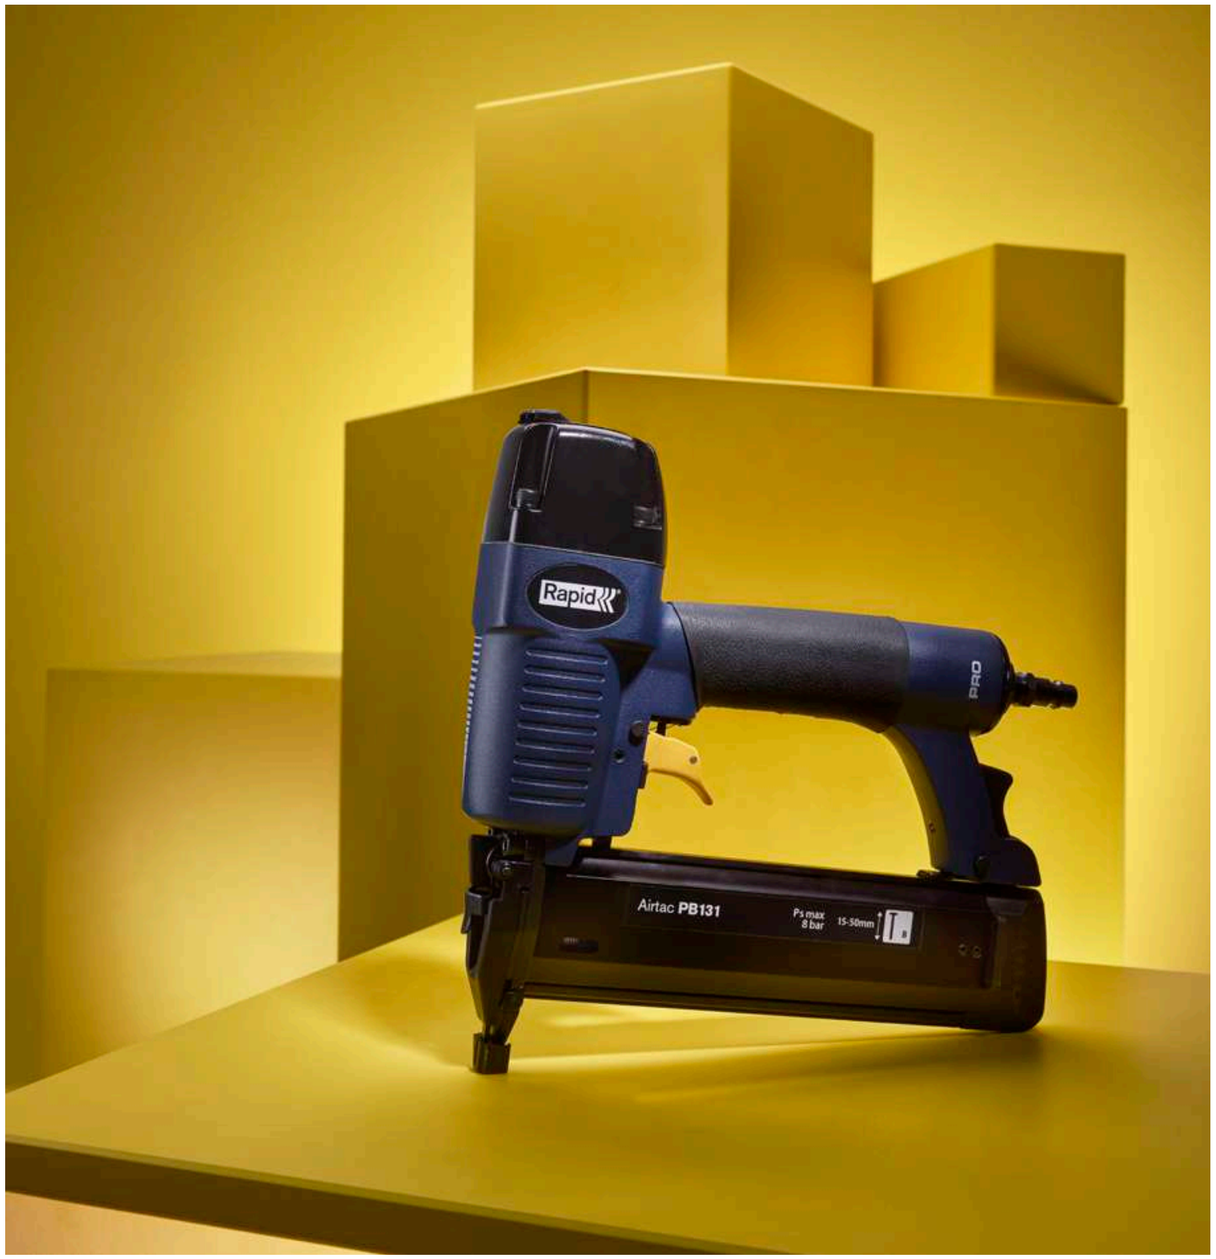
PNEUMATIC STAPLE AND NAIL GUNS

When the job demands high-tempo, precision fastening, Rapid's pneumatic staple and nail guns always deliver the best results. Our range covers all needs, from simpler fastening tasks and jobs around the house to professional applications and more specific challenges such as framing. Our powerful, efficient products make working with long-leg staples easy and trouble-free. Every model is characterised by ergonomic performance enabled by lightweight construction, great balance and smartly designed, easy-to-use handles - and of course, we have also prioritised performance, user-focused features and creating a selection of models that covers many different types of staples and nails. Together these features deliver outstanding working efficiency and user comfort, whatever the job.

Suitable for: framing, panelling, upholstery, mouldings.



PFN3490

STAPLE AND NAIL GUIDE

Find the right type of staple and nail – our guide makes it easy to find the model that aligns with your needs.

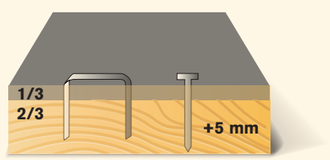
Printed on every product, you'll find the information you need to match the product with the right staple or nail. On this page you can read how to determine the correct leg length. The tables below contain information on different staple and nail dimensions. The guide on the following three pages shows which staple or nail that goes into which Rapid tool, as well as options for other, non-Rapid brands.

	140	13	53	28	36	7	606	1	11	12	53F	100	958	970
A mm	10.6	10.6	11.4	6.3	7.7	7.8	6	10.2	11.7	12.95	11.3	11	13	12.3
B mm	6-16	4-20	4-20	9-11	10-14	12-14	12-30	8-10	10	6-16	6-14	6-14	6-12	6-14
C mm	1.3	0.7	0.75	1.3	1.3	1.22	1.1	1	1.25	0.95	1.25	0.9	0.7	1.25

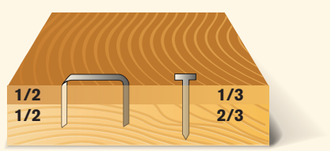
	980	BMN	90	8	9	16	16A	21P	21B	23P	32	34	50
A mm	13	11.2	5.7	2	1	2.8	2.8	0.8	1.5	0.64	3.1	7.0	5.8/7
B mm	8-14	6-14	20-40	15-50	15	14-50	32-64	20-30	20-40	15-35	32-64	50-90	50-90
C mm	1.25	0.75	1.27	1.25	1.25	1.62	1.62	0.8	0.8	0.64	1.8	2.8/3.1	2.5/2.8/3.1

Choose the correct leg length

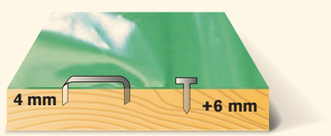
The thickness and the type of material are determining the length of the staple or nail to be used:



Standard rule
A staple or nail should be 3 times as long as the material to be fixed. Add another 5 mm on the nail.



Hardwood / hard material
For supporting constructions made from hardwood a staple which is twice as long as the material to fix is sufficient. A nail should be 3 times as long as the material to be fixed.



Fine / thin material foil or fabric
To fix fine and thin material a staple which is 4 mm longer than the material is ideal. A round head nail should be 6 mm longer than the material to be fixed.

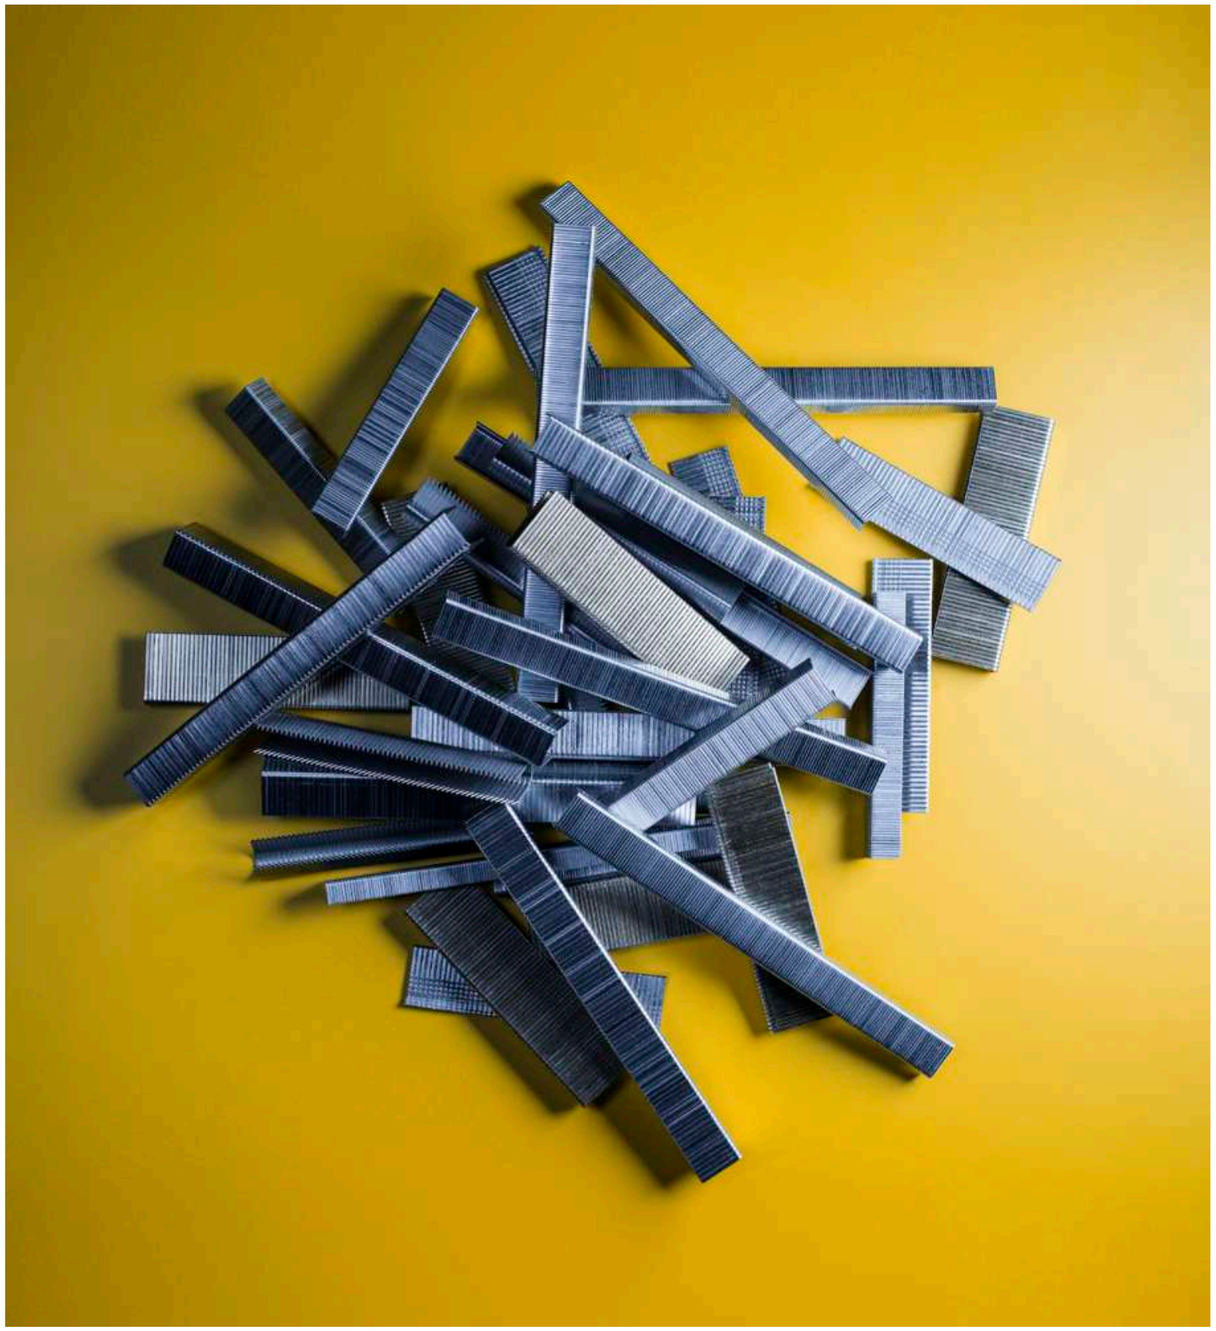
STAPLES AND NAILS

One of the most important aspects of meeting customer demands is being able to offer perfect fastening tools. Another equally crucial element is being able to supply the right type of staples or nails for the job. At Rapid we are experts at both, and we also understand the importance of staple or nail quality. Our product range is the widest on the market and in order to achieve the best possible end results, we always recommend using Rapid original staples and nails. Using the wrong sized staple or inferior quality staples can cause the tool to jam and malfunction.



FLATWIRE FOR HEAVY DUTY AND CONSTRUCTION

These quality flatwire, galvanized staples feature a larger holding area against the surface material making them ideal for working with insulation material and thin plastics as well as thin cardboard and carpets. Precision cut legs optimise material penetration. Also available in stainless steel.

FINEWIRE FOR LIGHT DUTY AND DECORATION

These quality finewire staples are ideal for working with textiles. Featuring a discreet, low visibility design and created to have a minimal effect on textile fibres, they are also a great solution when labelling. Made from high performance, galvanized wire, their legs are precision cut for optimal penetration.

FOR LOW VOLTAGE CABLES

With their rounded crown, these flatwire staples are specifically designed for fastening low voltage cables up to 50 V such as computer, hi-fi speaker or telephone cables. Diverging points, DP, makes leg points go in opposite directions, for extra strong bonding.

NARROW CROWN

An effective solution when fixing through tough materials or where long depth is required, these precision cut, narrow crown staples are made from high performance, galvanized steel and work like a double brad. Resin coated to increase their resistance to removal, these are ideal for heavy duty fixing, flooring, wood panelling, wall boards, frames, partitioning. Resin coating gives them optimal fixing characteristics in wood.

- Industrial 15° coil framing nails.
- Ideal for framing, sheathing, decking, sub-flooring and working with crates, pallets or box assembly.
- Bright finish for indoor use.
- Comply with Construction products regulation (EU) 305/2011. Service Class 1 Nails, CE approved, Declared performances according to DIN EN14592.

GLUING

Do you know that Rapid is the market leader when it comes to glue guns? Just like all our products, Rapid glue guns are renowned for their high quality, smart functions and design features that enhance the user experience and make every job as easy and efficient as possible.

GLUE GUNS

A good glue gun can be the difference between a job well done and less impressive results. For example, a Rapid glue gun doesn't drip and will never clog up with old glue residue. Areas of use are many, and by switching between different kinds of glue sticks you can use the same glue gun to bond a wide variety of materials. Our glue guns heat up quickly, minimising the need to wait before getting to work and represent the market's strongest line of glue guns for any kind of assignment or application. Ergonomically designed, easy to use and available in electrical, rechargeable or battery-powered versions, Rapid glue guns optimise efficiency and deliver quality results.

GLUE STICKS

Hot-melt adhesives have a number of advantages – they're free from toxic components, they don't spill and they provide the best way to long-lasting, quick-drying fastening. In order to cover every application and requirement, Rapid has developed the market's widest range of glue sticks for any application. Our range encompasses technical and professional glue, glue for a wide variety of materials and glue in different colours. So, no matter what you want to bond, to achieve the best possible result, we always recommend Rapid glue sticks.

INSTALLATION
These 12 mm glue sticks deliver quality bonding thanks to high resin levels and are perfect for a wide range of installation applications. For perfect bonding use speciality glue dedicated to a specific materials such as wood, textile/leather, ceramics or PVC/cables. Also available as transparent and white universal glue for all kind of bonding. Comes in master packs of 48 pcs long glue sticks ideal for installation and working on large surfaces requiring high amount of glue.

FIX AND REPAIR
These 12 mm glue sticks deliver quality bonding thanks to high resin levels and are perfect for a wide range of fix and repair jobs at home. For perfect bonding use speciality glue dedicated to a specific material such as wood, textile/leather, ceramics or PVC/cables. Available also as transparent, white and black universal glue for all kind of bonding. Comes in short sticks to quickly switch from one type of glue to another, and long sticks to cover wider surfaces quickly, reducing the time spent to refill.

HOT AIR GUNS

A hot air gun is a true multi-purpose tool that can assist you in a wide variety of tasks. Rapid offers everything from simpler hot air guns for home and DIY use to advanced products with power up to 2200 W. All our products are safe and easy to use and as always, ergonomics is a key functionality and design factor. The result is tools with perfect balance and handles that reduce operator fatigue and discomfort.

Suitable for: paint removal, moulding metal and plastic pipes, overlapping while welding, loosening screwed-tight joints and rusty nuts and lighting the grill.

Reduction Nozzle

Reduces the width of the airflow. Creates a narrowly directed jet ideal for gluing edges, soft soldering and removing paint in tight corners. Available in three different top diameters.

Description	Art. No.	EAN Code	Units
Reduction Nozzle 9 mm	24928500	7313469285004	1
Reduction Nozzle 14 mm	5000207	4051661008115	1
Reduction Nozzle 20 mm	212148	7313462121484	1

Glass Protection Nozzle

Protects glass from cracking as a result of overheating by providing more accurate direction of the flow of air. Ideal for removing paint from window frames. Available in two different widths.

Description	Art. No.	EAN Code	Units
Glass Protect Nozzle 50 mm	212149	7313462121491	1
Glass Protect. Nozzle 75 mm	24928600	7313469286001	1

Wide-Slot Nozzle

Creates a wide spread of the airflow when working on surfaces. Ideal for more efficient faster working when removing paint, repairing tarred roofing paper, shaping plastic and much more. Available in two different widths.

Description	Art. No.	EAN Code	Units
Wide-Slot Nozzle 45 mm	212151	7313462121514	1
Wide-Slot Nozzle 75 mm	24928700	7313469287008	1

Reflector Nozzle

Heats up all around the material by reflecting the hot airflow. Provides uniform heating all around the pipe. Ideal when soldering thin pipes, shaping PVC or shrinking shrink tubes.

Description	Art. No.	EAN Code	Units
Reflector Nozzle	212150	7313462121507	1
Reflector Nozzle + Shrink Tubing Set	5000209	4051661008139	1

Shrink Tubings

Ideal for shrinking onto cable terminals, breaks or looms. Optimal use together with a reflector nozzle. Available in three sets with different shrink tubing diameters.

Description	Art. No.	EAN Code	Units
Shrink Tubings Set 1, 1,5-5 mm	24947400	7313469474002	1
Shrink Tubings Set 2, 5-10 mm	24947500	7313469475009	1
Shrink Tubings Set 3, 3-12 mm	5000208	4051661008122	1

Paint Scraper Set

Handy Paint Scraper set for all types of paint removal. Supplied in 5 parts, including spatula and 3 replaceable cutting blades designed for different surfaces.

Description	Art. No.	EAN Code	Units
Paint Scraper Set	5000210	4051661008146	1

RIVETING

Riveting pliers for blind rivets and blind rivet nuts are developed for the fastening of tough and hard materials where the back is inaccessible. Rapid offers a number of products that have been constructed with attention to ergonomics, user friendliness and powerful performance. To ensure the correct dimensions, every pack of blind rivets or blind rivet nuts comes complete with a corresponding drill. Our riveting plier product range also includes punch pliers and eyelet pliers.

RP110

Description	Art. No.	EAN Code	Units
Clamshell - West	5000669	4051661021022	5
Clamshell - East	5000731	4051661022784	5

A rivet nut insertion tool designed to provide a solution when fastening materials together without access to the rear to tighten a bolt. With this tough, die cast aluminium tool, you can insert M3, M4, M5 and M6 rivet nuts – internally threaded tubular rivets.

- For M3, M4, M5, M6 rivet nuts
- Integrated wrench
- Strong metal jaws
- Soft grip handle
- 3 year guarantee

Rivet Nuts

M3 · M4 · M5 · M6

Description	Specification	Pcs	Art. No.	EAN Code	Units
M3	Steel	20	5000670	4051661021046	5
M4	Steel	20	5000671	4051661021060	5
M5	Steel	20	5000672	4051661021084	5
M6	Steel	20	5000673	4051661021107	5

- Apply where the use of a tapped thread is impractical or impossible
- Can be anchored entirely from one side
- Removes the need for a traditional bolt on the 'rear' of the materials being fastened together.
- Increases working efficiency by allowing the user to complete the job from one side.
- Ideal also for fastening materials with a low grip range (under 3 mm).
- A drill of correct size is included in the packaging

High Performance Rivets

Ø 3.2 ALU · Ø 4.0 ALU · Ø 4.8 ALU

Description	Specification	Pcs	Art. No.	EAN Code	Units
Ø3.2 x 8 mm	Aluminium	50	5000383	4051661013430	5

- Use for jeans decoration, repairing pockets or belt loops or textile and leather fixing
- Including fixing system

GARDEN TOOLS

In our outdoors range, Rapid offers a variety of high quality garden pliers that facilitate efficient, neat fastening of plants, vines or garden fences. Our pliers have all been designed with the highest attention to ergonomics and functional design and hog rings are available in a number of different dimensions and coatings to accommodate any situation or requirement.

GARDEN PLIERS

GP238

Hog Ring 6–11–16 mm

Description	Art. No.	EAN Code	Units
Clamshell	24311200	7313463112009	5

Great value pliers designed to make garden work easier and more comfortable. Ideal for fixing young plants, securing branches or attaching netting. Handy 3-position locking function means that securing can be made without damaging the plant.

- Delivers a closing diameter of 2, 11 and 16 mm
- Optimal performance with VR38 hog rings
- 3-position locking function
- Quick load magazine
- Ergonomic soft grip handle
- Handle lock for easy storage
- 2 year guarantee

FENCE PLIERS

FP222

Hog Ring 5–11 mm

Description	Art. No.	EAN Code	Units
Clamshell	23468100	7313464681009	5

For more demanding garden tasks such as fixing thicker wire netting or chain link fencing, these fence pliers are a tough, reliable solution that delivers great results.

- Delivers a closing diameter of 5-11 mm
- Optimal performance with VR22 hog rings
- High capacity hog ring magazine
- Ergonomic soft grip handle
- Handle lock for easy storage
- 2 year guarantee
- Cut wire function for up to Ø2 mm wire
- Loading indicator

FP216

Hog Ring 2–8 mm

Description	Art. No.	EAN Code	Units
Clamshell	23467900	7313464679006	5

Reliable, easy-to-use fence pliers. Ideal for agricultural applications requiring thinner fencing like pets protection.

- Delivers a closing diameter of 2-8 mm
- Optimal performance with VR16 hog rings
- High capacity hog ring magazine
- Ergonomic soft grip handle
- Handle lock for easy storage
- 2 year guarantee
- Loading indicator
- Cut wire function for up to Ø2 mm wire

FP20

Hog Ring 5–11 mm

Hog Ring 2–8 mm

Description	Art. No.	EAN Code	Units
Clamshell	23468000	7313464680002	10

Versatile, great value and easy-to-use fence pliers. Ideal for a number of applications, including fixing wire netting to fence wire. Magazine-free operation.

- Can deliver a closing diameter up to 11 mm
- Optimal performance with VR16 and VR22 hog rings
- Magazine free operation
- Ergonomic soft grip handle
- Handle lock for easy storage
- 2 year guarantee
- Cut wire function for up to Ø2 mm wire

VINE PLIERS

LIG175

Hog Ring 6–18 mm

Hog Ring 6–20 mm

Description	Art. No.	EAN Code	Units
Box	40107754	3221631077545	8

Professional standard, durable vine pliers featuring a high capacity magazine and precision performance. Ideal for securing large branches.

- Delivers a closing diameter of 6-20 mm
- Optimal performance with C75 and C85 hog rings
- High capacity hog ring magazine
- Ergonomic soft grip handle
- Hardened steel for best durability
- 2 year guarantee

LIG150

Hog Ring 4–14 mm

Description	Art. No.	EAN Code	Units
Box	40107753	3221631077538	8

Professional standard, durable vine pliers with high capacity magazine. Ideal for securing branches.

- Delivers a closing diameter of 4-14 mm
- Optimal performance with C50 hog rings
- High capacity hog ring magazine
- Ergonomic soft grip handle
- Hardened steel for best durability
- 2 year guarantee

HOG RINGS

These galvanised, high quality hog rings are an effective solution for different outdoor fastening applications.

ELECTRIC STAPLERS

105E

Description	Specification	Art. No.	EAN Code	Units
Box - EU plug	66/6-8 mm; 220 V	10870402	7313468704025	1
Box - UK plug	66/6-8 mm; 230 V	10870410	7313468704100	1
Box - US plug	66/6-8 mm; 115 V	10870425	7313468704254	1

Electric stapler for office and packaging stapling. Fast stapler with slim design for added versatility. Equipped with the power, reliability and versatility demanded by industrial users. Two or more staplers can be linked for simultaneous multi-stapling.

- Capacity: 50 sheets (80 gsm paper)
- Adjustable stapling force
- Adjustable stapling depth 0-102 mm
- Slim design enables it to be installed in a variety of configurations
- Protection visor, cuts the power when lifted
- Serial mounting via opto cables for greater production capacity

3 staplers in 1 with the same functions as 105E. Equipped with interchangeable insert staplers, the Rapid 106E can handle both flat, saddle stapling and loop stapling (accessories). Suitable for work places where sheets and brochures are to be stapled.

- Capacity: 50 sheets (80 gsm paper)
- Adjustable stapling force
- Maximun stapling depth 220 mm
- 3 staplers in 1 – interchangeable insert staplers
- Protection visor, cuts the power when lifted
- Delivered with wide worktable and pedal
- Serial mounting via opto cables for greater production capacity
- Optional extras: Narrow work table, saddle staple rail, stapling head for loop stapling, opto cables.
- Tested for 500.000 operations

Opto Cable 400 mm for 105E and 106E	17774101	7313467741014	1

Narrow work table (60 mm) with anvil.

R252/106 Stapling head for loop stapling (ring).

The pedal is ideal for precision stapling in industrial applications. Simple plug-in connection.

Special rail for saddle stapling with two or more 106E staplers.

Simultaneous stapling action via linked opto cables (40 cm). The staplers are sequence controlled, to avoid overloading the power supply.

Vice (bench clamp) enables stapler to be firmly fixed to work-table if required.

The adjustable industrial multi base for mounting up to 4 staplers enables the staplers to be easily moved to anouther working area.
